

PRODUCT INFORMATION BROKEN STONE FORK WITH GRAPPLE

The required connection for this attachment demands 1x double-acting hydraulic function.

VERSATILE ATTACHMENT

The broken stone fork is a perfect attachment for GIANT machines to easily break out and scoop out bricks/vowels. The screwed teeth are placed close together so that no stones fall through or get stuck and only the sand is sieved out. The GIANT broken stone fork has an extra slanted tooth on both sides that ensures no stones fall off the broken stone fork.
