

PRODUCT INFORMATION

RAKE BUCKET

These (street) belt buckets are standard equipped a wide Hardox blade, long heel and the bars run in front of the frame. The bucket is specially designed for spreading out street work.

ESSENTIAL ATTACHMENT FOR PAVERS

The rake bucket is specifically designed for removing pavement. Thanks to its unique shape with rounded edges and low sidewalls, stones and tiles can smoothly roll into the bucket, allowing a large surface area of pavement to be removed in one motion. The wide blade at the front ensures a smooth substrate is left behind, which is ideal for re-paving roads or plazas.
